

In his junior year of high school in Weston, my son lost his father due to a prolonged illness. Two years later he was faced with a \$30,000 bill (after other scholarships and grants) for his freshman year of college. The scholarship provided by the WCL helped relieve some of the financial stress he faced. We also felt that he had the support and acknowledgement of the town! My son has since earned a doctorate with honors and has been successfully practicing Physical Therapy for nearly two years. Our sincere thanks for your generous help getting him started.
